PREFABRICATED CHANNEL

GEOFLAM® C Light channels are 35 mm thick pre-moulded non-combustible elements, specially designed for the installation of technical ducts such as gas pipes, medical fluids and various pipes. In some cases, our channels can also be used for smoke extraction and ventilation ducts.

The channels are manufactured with longitudinal and end rabbets allowing them to be fitted together, for quick and easy installation on site.

Advantages

- ✓ Pre-moulded product with a cover for quick installation on site
- ✓ Silicate-free product
- ✓ Can be painted with water-based acrylic paint
- ✓ Can easily be cut with a circular saw, sabre saw or hand saw
- ✓ Wide range of sizes
- ✓ Meets environmental, health and safety standards

Installations

Glue
[50 x 50 mm to 350 x 200 mm] *
** limit of the internal section of the enclosure*

Mixture of GEOPLÂTRE® N and sisal fiber
In certain configurations, this application is recommended. Please consult us.

Transport and storage

Transport and store on a flat, protected surface (out of water).

Applications

- Fire protection services (various pipes, gas pipes, medical fluids, etc.)
- Protection of electrical cable trays up to a fire exposure time of EI 120 (2h)
- Creation of smoke extraction and ventilation ducts (different assembly principle: please consult us).

Certifications

Classification A1 according to EN 13501-1

Product classified A+ (VOC emission to indoor air)

Classification and tests

- ✓ Certified according to the fire resistance test standards:

EN 1366-1
EN 1366-5
EN 1366-8

- ✓ Certified according to the fire resistance classification standards:

EN 13501-1
EN 13501-2
EN 13501-3
EN 13501-4

Technical documents available

- ✓ Technical data sheet
- ✓ Environmental and health declaration
